

Brand Guidelines

SHUSMA READYMADE GARMENTS TRADING LLC

Heritage Luxury Fashion Ecommerce

Version 1.0 / August 2026

Brand Overview

SHUSMA Readymade Garments Trading LLC is a heritage-luxury fashion brand specializing in premium readymade garments for the UAE and Indian diaspora markets. The brand embodies a philosophy where Victorian-era ornamental design traditions meet contemporary ecommerce excellence, creating a shopping experience that feels both timeless and thoroughly modern. The visual identity draws inspiration from classical tailoring traditions, represented by the ornate mannequin dress form logo mark, while clean sans-serif typography signals a commitment to modern usability and accessibility across all digital touchpoints.

Attribute	Detail
Brand Name	SHUSMA Readymade Garments Trading LLC
Arabic Name	شوسما لتاجر الملابس الجاهزة ش.ذ.م.م
Industry	Fashion / Readymade Garments Ecommerce
Market	UAE / Indian Diaspora
Design Philosophy	Heritage Luxury meets Modern Commerce
Primary Channel	Mobile-first Ecommerce Application

Color Palette

The SHUSMA color palette is built around a warm gold foundation that echoes the ornamental details of the brand logo. The primary gold tone provides luxury and warmth, while the cream background creates a soft, inviting canvas. Supporting neutrals ensure readability and hierarchy, with the warm brown text tones maintaining visual cohesion throughout all touchpoints.

Primary Gold #C9A961 CTAs, accents	Dark Gold #A07D3F Hover, gradients	Light Gold #E2CC8A Highlights	Metallic Gold #D4AF37 Special accent
Warm Cream #FAF8F5 Page background	White #FFFFFF Cards, content	Near Black #1A1A1A Primary text	Warm Brown #5D4E37 Secondary text

Typography

The SHUSMA typography system pairs an elegant serif display font with a clean geometric sans-serif for UI elements. Playfair Display creates luxury impact for headlines, while Inter ensures readability across all mobile screen sizes. Arabic content uses Noto Naskh Arabic for the UAE market.

DISPLAY: PLAYFAIR DISPLAY

Elegance Redefined

The Art of Readymade Fashion

New Collection 2026

BODY: INTER

H1 Bold 24px

H2 SemiBold 20px

H3 Medium 16px

Body text 14px for product descriptions and general content throughout the mobile application.

Caption 12px for labels and secondary information.

Spacing and Grid

The spacing system uses a 4px base unit with mobile-first approach. Mobile horizontal padding is 16px, vertical section spacing 20px. Product grid: 2 columns mobile, 3 tablet, 4 desktop. Max content width: 1440px centered. 8px baseline grid for vertical rhythm consistency.

Token	Value	Usage
space-1	4px	Tight gaps
space-4	16px	Mobile padding
space-6	24px	Desktop section gap
space-8	32px	Major section divider
space-16	64px	Hero section padding

UI Components

Every component follows the brand design tokens and is optimized for touch interaction. Buttons feature 44px+ tap targets, product cards use 3:4 image ratios, and all interactive elements provide gold accent highlights with smooth 200-300ms transitions.

CHAPTER 6

Brand Imagery

Brand photography follows warm, golden-hour lighting with premium retail aesthetics. All imagery maintains the gold and cream color language and avoids cold or clinical tones. Product photography uses model-less garment shots on cream backgrounds for consistency.

Application Screens

The SHUSMA ecommerce application is designed mobile-first with a responsive layout that adapts beautifully from 375px mobile screens to 1440px desktop displays. Eight core screens cover the complete shopping journey from discovery to order confirmation.

Screen	Purpose	Key Features
Home	Discovery and engagement	Hero banner, categories, trending, new arrivals
Product Listing	Browse and filter	Filter chips, sort, grid/list toggle
Product Detail	Product information	Gallery, size/color selector, related items
Shopping Cart	Review and modify	Qty controls, promo code, order summary
Checkout	Purchase flow	Address, delivery, payment, COD
My Account	Profile management	Orders, wishlist, addresses, rewards
Order Confirmation	Post-purchase	Timeline tracker, share, continue
Search Results	Product discovery	Keyword highlighting, sort, filters

CHAPTER 8

Design System Integration

The SHUSMA design system is packaged as an open-design compatible design system located at `open-design/design-systems/shusma/`. It includes a `DESIGN.md` specification, `tokens.css` with all CSS custom properties, a `manifest.json` for project configuration, and an interactive `components.html` showcase. To use it in open-design, select "SHUSMA" from the Design Systems catalog in the Studio.

The design system defines 56 design tokens covering colors, typography, spacing, radius, shadows, and transitions. All tokens are accessible as CSS custom properties for direct use in HTML/CSS prototypes or can be converted to Tailwind CSS v4 format for Next.js and React component development. The component showcase demonstrates every UI element in both default and interactive states.
